Heart Wise Exercise

What We Do

Heart Wise Exercise partners with community organizations to develop programming, and designate facilities, programs and classes where individuals can exercise regularly to prevent or limit the effects of living with a chronic health condition.

Our objectives are:

- To identify exercise facilities and classes that are suitable for individuals with or at risk of developing a cardiovascular or chronic health issue.
- To help those individuals choose exercise facilities and classes that are “heart friendly”.

An easy way to identify a qualified Heart Wise Exercise program is to look for the Heart Wise Exercise logo and symbol on web-sites, promotional material and in a facility’s list of classes.

About Heart Wise Exercise Programs

Heart Wise Exercise programs are intended for people who are interested in or concerned about their heart health.

A Heart Wise Exercise program meets the following criteria:

1. Encourages regular, daily aerobic exercise.
2. Encourages and incorporates warm up, cool down and self-monitoring with all exercise sessions.
3. Allows participants to exercise at a safe level and offers options to modify intensity.
4. Includes participants with chronic health conditions – physician approval *may* be required.
5. Offers health screening for all participants.
6. Has a documented emergency plan that is known to all exercise leaders, including the requirement of current CPR certification, phone access to local paramedic services and presence of an AED.

These criteria could cover a variety of levels and types of programs. Please read the program description provided by the facility to find the Heart Wise Exercise program most suitable for you. If you are unsure, please contact the program operator.
